PROFILE

Hands-on engineering manager and software engineer with 15+ years building software across AI infrastructure, maritime operations, healthcare, and travel. I lead teams and stay close to architecture, implementation, and delivery: making complex systems easier to understand, more reliable in production, and useful to the people who depend on them.

CORE SKILLS

LANGUAGES & PRODUCT	TypeScript · Go · Python · React · Node.js · Svelte · GraphQL · gRPC · REST
CLOUD & DATA	AWS · GCP · PostgreSQL · MongoDB · DynamoDB · Redis · Docker · Kubernetes · CI/CD
SYSTEMS	AI infrastructure · workflow orchestration · distributed systems · event-driven architecture · observability
WAYS OF WORKING	DDD · hexagonal architecture · TDD · reliability · technical direction · mentoring · product collaboration

EXPERIENCE

Nov 2025 - Present

Remote · Barcelona

Eachlabs

AI INFRASTRUCTURE

Engineering Manager (Hands-On)

STACK TypeScript · Go · AWS · workflow orchestration · AI agents

- Lead the engineering team while remaining close to architecture and implementation: structured 1:1s, feedback loops, priorities, and clear expectations.
- Architect and build critical workflows, executors, APIs, backend services, and AWS infrastructure for an AI product platform.
- Drive technical clarity across teams and report engineering health, risks, and strategy directly to the CEO.
- Set the bar for maintainability through code review, system simplification, reliability work, and practical architectural decisions.
- Build AI agents and internal tools with security gates, keeping agent-assisted work useful without weakening product or data boundaries.

Jul 2022 - Nov 2025

Barcelona

Ninety Percent of Everything (90POE)

MARITIME SOFTWARE

Senior Software Engineer · Team Lead

STACK Go · React · TypeScript · GraphQL · PostgreSQL · MongoDB · Redis · AWS · Docker · Kubernetes

- Owned backend and frontend services for vessel planning, itinerary, port-call, and onboard workflows used in real maritime operations.
- Led a cross-functional engineering team through technical direction, code reviews, mentoring, delivery planning, and close work with product owners.
- Implemented APIs, database migrations, system optimisations, CI/CD improvements, and architecture changes that reduced operational friction and accelerated customer onboarding.
- Delivered interactive map-based planning tools and contributed to the migration to TypeScript, a new component system, and stronger Playwright/Jest test coverage.
- Upgraded and launched features across a group of 10 products, their frontends, and APIs while keeping delivery aligned with product and technical owners.

Jun 2021 - Jun 2022

Barcelona

Robbie AI

HEALTHCARE WORKFLOWS

Lead Front End Engineer

STACK React · TypeScript · GraphQL · PostgreSQL · Jest · Cypress · Docker

- Led frontend development for healthcare applications used by hospitals and nursing staff to support clinical workflows and patient safety.
- Built React and TypeScript interfaces and contributed across the stack with GraphQL APIs, PostGraphile, PostgreSQL row-level security, and automated tests.
- Worked with product and medical teams to translate healthcare requirements into clear, reliable, production-ready software.
- Kept the design system scalable across internal and external applications while coordinating priorities with the CEO and CTO.

May 2020 - Jun 2021

Barcelona

AI-O · Artificial Intelligence Orchestrator

DIGITAL HEALTH

Full Stack Engineer

STACK React · React Native · Node.js · TypeScript · PostgreSQL · WebRTC · Docker

- Developed healthcare products that helped doctors and hospital managers monitor COVID-19 evolution and make data-informed decisions.
- Worked across the PERN stack (PostgreSQL, Express, React, Node.js) and TypeScript, delivering interfaces, APIs, and internal back-office tools.
- Led development across senior and junior engineers, set the CI/CD and development environment, and translated business requests into executable technical work.

Nov 2019 - Dec 2021

Barcelona

HartCare

DIGITAL HEALTH

Co-Founder

STACK Python · React · React Native · REST APIs

- Co-founded a digital health startup focused on products, algorithms, and services for cardiovascular care.
- Led early platform architecture and development while collaborating with healthcare professionals on practical tools for patients and medical staff.

FOUNDER & EARLIER WORK

Apr 2010 - Present

Barcelona

Euroviajar.com

TRAVEL PLATFORM

Founder

- Own and grow an international travel platform across product design, application development, SEO/SMO, content, and business operations.
- Built the product through hands-on engineering and coordinated writers, marketers, and other contributors as the platform evolved.
- Turned a long-running product into a durable operating business by adapting its technology, content, and audience strategy over more than 15 years.

2019

Spain

Teldat S.A.

BANKING DASHBOARDS

Software Engineer

STACK React · Redux · Puppeteer · Node.js

- Built dashboards for monitoring banking-sector data consumption in real time, combining a React interface with Node.js services and Puppeteer-generated views.

2018 - 2020

Leiden · Barcelona

HartCare Algorithms · LUMC

HEALTH DATA

Software Engineer · Research

STACK Python · kNN · React · React Native · REST APIs

- Developed a Python algorithm for heart-arrhythmia detection using k-nearest-neighbour methods and contributed to its clinical research context at LUMC.
- Built cross-platform interfaces and REST APIs to make the algorithm and its results usable across web and native applications.

2017 - 2019

Delft, Netherlands

TU Delft · Medisign

MEDICAL INNOVATION

Student Assistant · Medical design

- Assisted with the coordination of the Medisign specialisation, including the Capita Selecta programme and collaboration across medical-design courses.
- Connected design, research, and technology perspectives for students working on complex healthcare problems.

2011 - 2019

Spain · Netherlands

Selected client work

PRODUCT ENGINEERING

Software engineer · consultant

STACK React · Node.js · Python · OpenCV · Leaflet · ECharts · Highcharts

- Built APIs, eCommerce systems, interactive maps, and research tools for Desguaces Aeropuerto, Zaragoza Dinámica, Bazus, Siwell, Toldos Serrano, Biopyc, Inbonis Rating, Alten, and other organisations.
- Created a statistical market-analysis tool with JSON/Node.js data, ECharts and Highcharts visualisations, atypical-product detection, and on-the-fly graphics generation.
- Developed an OpenCV system for tracking surgical tools in knee arthroplasty and Leaflet/React itineraries connected to WordPress APIs.

TEACHING & MENTORING

Jan 2021 - Dec 2024

Barcelona

IT Academy · Barcelona Activa

MENTORING

Coding Mentor

- Mentored hundreds of students through React, Node.js, and Data Science projects, technical assessments, and career preparation.
- Designed advanced courses and helped evolve the curriculum towards current industry practices.

2020 - 2024

Barcelona

Eurecat · Ceina Formació

TEACHING

Software development mentor · teacher

- Taught full-stack web and app development, including frontend, backend, networks, deployment, accessibility, security, and testing.
- Mentored Node.js, React, and Data Science projects and delivered advanced React, coding, and testing training for professional teams.

EDUCATION

2017 - 2019

Delft, Netherlands

TU Delft

MSc Integrated Product Design · Medisign specialisation

2010 - 2015

Zaragoza, Spain

University of Zaragoza

Degree in Industrial Design Engineering and Product Development

SELECTED PUBLIC WORK

2025 · *A Novel Approach to Retinal Blood Vessel Segmentation Using Bi-LSTM-Based Networks*, Mathematics.

2020 · *Perspectives of Patients and Professionals on Information and Education After Myocardial Infarction*, JMIR Human Factors.

2024 · *Ace the Technical Interview with AI*, practical workshop at Talent Arena / MWC Barcelona.

LANGUAGES Spanish · Albanian · English
